# Instructions for authors

## GENERAL INSTRUCTIONS

---

- Manuscripts should be provided on word-processor disks (3.5-in, for IBM, IBM-compatible, or Apple computers) with three hard copies (text and figures) printed on one side of standard-sized white bond paper, double-spaced, with 2.5-cm margins. Pages must be numbered. **Standard typed page = 25 lines of 75 characters (including spaces) double-spaced, 2.5-cm margins = a total of 275 words per page.**
- All texts should be submitted in **English**. In the case of translations, the text in the original language should be included.
- On the **title page**, provide title of manuscript (title should be concise, not exceeding 120 characters, including spaces), **short running title**, **keywords**, and **acknowledgments**, as well as **full names** (first name, middle name(s), and last name) with **highest academic degrees** (in country-of-origin language), affiliations/address, telephone No., fax No., and E-mail address.
- **Illustrations** (photographs, tables, graphs, figures—high-quality printouts, glossy prints, and/or high-quality scans as jpg files) should be of good quality or professionally prepared, numbered according to their order, with proper orientation indicated (eg, “top,” or “left”), and **SHORT legends** provided, not repetitive of text.  
As figures and graphs may need to be reduced or enlarged, all absolute values and statistics should be provided. All **illustrations should be cited** in the text, with distinct numbering for figures and tables. Illustrations will be reproduced in full color only when clearly necessary, eg, images from nuclear medicine or histology.
- Include **HEADINGS** using a consistent style for the various levels of headings, to highlight key points and facilitate comprehension of the text.  
The Publisher reserves the right to add or delete headings when necessary.
- **Abbreviations** should be used sparingly and expanded at first mention.
- Use **Système International (SI)** units.
- Use **generic names of drugs**.
- All **references** should be cited in the text and **numbered consecutively using superscript arabic numerals**. The author-date system of citation is **NOT** acceptable. “In press” references are to be avoided. In the **bibliography**, titles of journals should be **abbreviated according to the Index Medicus**. All authors should be listed up to six; if there are more, only the first three should be listed, followed by “et al” (*Uniform requirements for manuscripts submitted to biomedical journals*: see www.icmje.org). Where necessary, references will be styled to *Dialogues in Cardiovascular Medicine* copyediting requirements. Authors bear total responsibility for the accuracy and completeness of all references and for correct text citation. Example of style for references:
  1. Ouriel K, Geary K, Green RM, Geary JE, DeWeese JA. Factors determining survival after ruptured abdominal aneurysm. *J Vasc Surg*. 1990;11:493-496.
  2. Darling RC, Brewster DC, Ottinger LW. Autopsy study of unoperated abdominal aortic aneurysms: the case for early resection. *Circulation*. 1977;56(suppl II):II161-II164.
  3. Schulman JL. Immunology of influenza. In: Kilbourne ED, Alfade RT, eds. *The Influenza Viruses and Influenza*. Orlando, Fla: Academic Press Inc; 1975:373-393.
- **Copyediting**: all contributions to *Dialogues in Cardiovascular Medicine* will be styled by the Publisher’s editorial department according to the specifications of the current edition of the *American Medical Association Manual of Style*, Williams & Wilkins. Page proofs will be sent to authors for approval and should be returned within 5 days. If this time is exceeded, changes made by the editorial department will be assumed to be accepted by the author. Authors are responsible for all statements made in their work, including changes made by the editorial department and authorized by the author. The Publisher will edit Editorials, Abstracts, and Seminal Paper Summaries to required size if their length does not comply with specific requirements.
- **Copyright** of articles will be transferred to the Publisher of *Dialogues in Cardiovascular Medicine*. For reproduction

of existing work, it is the author’s responsibility to obtain copyright from the author(s) (including self) and the publisher(s) and provide copies of these authorizations with the manuscript.

## LEAD ARTICLE

---

The lead article should not exceed 30 standard typed pages (7000 to 8000 words), including an abstract of no more than 200 words, no more than 50 references, and a minimum of 5 - maximum of 10 illustrations (figures and/or tables). A maximum of 5-10 keywords should be included. **The 3 questions for the respondents should be introduced in or after the conclusion**. A separate list of **“10 references of seminal papers”** as well as a separate list of **“100 Key References”** should be provided.

## RESPONDENT ARTICLES

---

Respondent articles should not exceed 15 standard typed pages (3000 to 4000 words), including an abstract of no more than 125 words, no more than 10 references, and a minimum of 3 - maximum of 5 illustrations (figures and tables). A maximum of 5-10 keywords should be included.

## SEMINAL PAPER SUMMARIES

---

Seminal paper summaries take up one page of *Dialogues in Cardiovascular Medicine*: the length of each summary should **IMPERATIVELY** be comprised between 500 and 600 words, ie, **not exceed 3000 characters**. Summaries that are too short or too long will be returned to the author or edited by the Publisher. No figures, tables or references should be included in seminal paper summaries.

## FASCINOMA CARDIOLOGICA ARTICLES

---

Fascinoma Cardiologica articles (*A Lexicon of the Heart; Icons of Cardiology; Plants and the Heart; Trails of Discovery, etc*) should not exceed 2000 words (8 standard typed pages), should include 3 to 5 illustrations (figures and tables), and cite no more than 15 references. A maximum of 5-10 keywords should be included. No abstract.
